## MEDIA RELEASE

March 19, 1987

**DINOSAUR EXPERT JACK HORNER  
TO LEAD APRIL 6-9 COURSE AT UM**

**MISSOULA --**

Jack Horner, an authority on Cretaceous dinosaurs, will lead a University of Montana geology course April 6-9 on the paleobiology of dinosaurs.

Horner, curator of Bozeman's Museum of the Rockies, will conduct the two-credit class from 7 to 9 p.m. in Science Complex 131.

The course (Geology 195) will explore the biology, habits and evolution of dinosaurs, reptiles that dominated the earth for more than 1 million years. Horner will focus not on why dinosaurs became extinct about 65 million years ago, but on why they were so successful.

He will use his experiences at dinosaur excavation sites in Montana and elsewhere to explain how new insights have been gained that help explain how dinosaurs lived.

No prerequisites are required for the class.

Registration will be 10 a.m.-noon and 1-3 p.m. Monday, March 30, in UM's McGill Hall Gymnasium.
